

Security Analyst-Led Secure Code Review
– Precision and Insight in Every Line

Our Philosophy

Shift Left, Protect Your Future

Embed manual secure code reviews early in the software development lifecycle to drastically reduce vulnerabilities.

Uniting Development and Security

Bridging the gap between development and security teams to ensure a comprehensive and proactive defense against cyber threats.

What Makes Us Stand Out

Our Secure Code Review service is led by certified Security Analysts who have mastered the art and science of source code analysis.

Security Analyst-Led Comprehensive Review

With precision, analyze your code's logic and context to identify complex issues beyond the scope of automated tools, ensuring an accurate, relevant security assessment with validated findings.

Supported by In-House Developer Expertise

Providing in-depth insights, our Security Analysts work alongside our Developers to thoroughly understand and triage the inputs and functions of your code.

Validated Handwritten Reports with Actionable Recommendations

We do not rely on automated, jargon-filled exports, but instead provide professionally written reports with validated findings that expose the root cause propagation.

Virtual Findings Review with Security Analyst Team

A comprehensive walkthrough of the reported findings, led by our Security Analysts, for the learning and benefit of your programming teams and overall security state.

OwlEye Advantages over Automated Tools

Manual code reviews surpass automated tools in precision and insight.

Security Analysts-Led Reviews:

Validate every finding for accuracy and reliability.

Identify vulnerabilities automated systems might miss.

Understand complex business logic and custom applications to uncover deeply embedded flaws.

Detect malicious code and logic implanted by threat agents.

Ideal Scenarios for OwlEye Service

Major Codebase Alterations

Third-Party Attestation

Mergers and Acquisitions

Routine Audits

Legacy Software Reviews

Pre-Deployment Checks

Our Commitment to OWASP Standards

OwlEye adheres to OWASP's Secure Code Review standards to ensure your code meets industry best practices for security.

Let's Work Together

Our Purpose Driven Process:

1. Scope Review
2. Engagement Kick-off
3. Commence Manual and Automated Testing
4. Reporting
5. Virtual Findings Review

Deploy source code with confidence.
